

To Defend from Tsunami

- If a strong earthquake occurs
- Even if it is a small earthquake, but you feel it for a long time

"Evacuate to a higher location as soon as possible! "

Evacuation Site:High Location (as high as possible)

What are cautions when evacuating?

- 1 Give first priority to your own safety
- 2 Get away to opposite direction from the sea
- 3 In principle avoid evacuating by car

Till when will the evacuation last?

- 1 Stay at the evacuation site until tsunami warning or advisory is released
- 2 Don't get back soon after the water is removed
- 3 Tsunami is sometimes that after the second one is the biggest
