

# Emergency Notice

# Our water supply is in trouble!

## The dam is running low on water

The city's water shortage is becoming severe. At this rate, water pressure will be reduced and there may be cuts to your water supply. To prevent this from occurring, we kindly ask for your continued cooperation in conserving water.

### Requests for Residents

- **Be sure to turn off water promptly when you're done using it.**
- **Reuse leftover bathwater for washing clothes, watering plants, etc.**
- **Please make use of your toilet's "Small" flush (小) (instead of "Big" flush (大)) whenever you can.**
- **To prepare for potential water supply disruptions, please fill containers with necessary water in advance.**
- **Certain gas water heaters and/or toilets may become unusable with reduced water pressure. For more information, please contact the manufacturer or distributor.**
